EFit

SCR Power Controller

... the perfect fit for simple applications

Uncompromising process performance in a cost effective format

Easy to integrate and commission, yet highly cost effective, the EFit power controller provides no compromise control for resistive and infrared heating elements. Ideal for all heating applications and fully compliant to international quality, immunity, and emissions standards, EFit achieves outstanding stable, precise control in the most demanding industrial environments, even when cabinet space is at a premium.

The perfect fit for simple heating applications

Some industrial processes such as heat treatment require precise temperatures in order to comply with regulations and it is imperative that the workpiece temperature is kept within specific limits. This can be difficult to achieve in industrial plants where the operation of large machinery can cause fluctuations in the voltage supply. In the case of resistive heaters a variation of 10% in the supply voltage will generate a 20% variation in the power to the load, resulting in undesirable temperature fluctuations. EFit contains built in compensation that continues to apply stable power with better than ±2% linearity at the boundaries of the load, even during fluctuations in the supply. The result is a reliable, repeatable heating process and high quality end products compliant to demanding heat treatment standards.

- Connect Easily
  - No configuration
  - Compact installation
  - Global standardisation

- Control precisely
  - Eliminate voltage fluctuations
  - Achieve tight tolerances
  - Optimise energy use

- Improve processes
  - Minimise downtime
  - Maximise throughput
  - Reduce cost of ownership

Connect Control Improve

Eurotherm®

by Schneider Electric
The perfect fit

Connect Easily

Straightforward connection and commissioning, combined with a compact format to maximise use of cabinet space makes EFit the perfect fit for power control in both new and retrofit applications.

Easy Installation
- Nothing to configure — plug and play
- Nothing to fix — just clip onto DIN rail
- Minimal connection — pre-wireable plug in connectors

Easy Integration
- Compact dimensions reduce cabinet costs
- Integrates worldwide — global standard approvals and international voltages
- Consistent form factor — same height and depth across the range
- Ideal form and fit drop in replacement for Eurotherm TE10A

Control Precisely

EFit offers built in power stabilisation and a variety of firing modes for different types of load, which lead to energy savings and higher quality end products when compared to more basic power controllers.

Reduce hidden energy costs
- No wasted energy — built in compensation provides stable power control even during power fluctuations, eliminating unexpected changes in heater temperature
- Better power factor — save hidden energy costs with dedicated firing modes for each type of load, including a variety of burst modes that provide an efficient alternative to Phase Angle, such as advanced single cycle firing to reduce flicker in short-wave infrared heaters

Consistently high quality end products that comply to standards
- No scrap or rework - linearity better than ±2% of range, accurately controls heaters and maintains the correct load temperature

Improve Processes

Designed to give a fast stable response even in heavy industrial environments, EFit will enable you to run continuously optimised heating processes with minimum down time. This faster throughput improves OEE (Overall Equipment Effectiveness), helping you achieve your KPIs (Key Performance Indicators).

Increase throughput
- Maximise utilisation of plant equipment thanks to fast stable control response

Reduce down time
- Reliably operates in heavy industrial conditions — high immunity to electromagnetic disturbances
- Robust — operates in high temperature, humidity and altitude environments

Standardise Globally

EFit power controllers offer peace of mind for installers working in a global environment where industry regulations form an essential part of the engineering supply chain.

- Conformity to cUL directive (Canada and USA)
- CCC exempt: product not listed in catalogue of products subject to compulsory certification
- China RoHS
- CE compliance to power controller product standards

Let us show you how the benefits of EFit can save
Technical Specification

**General**

Directive: EMC directive 2004/108/EC

Low Voltage Directive 2006/95/EC

Safety specification: EN 60947-4-3:2000 (2000-01-12)

+ EN 60947-4-3:2000/A1:2006 (2006-12-08)

+ EN 60947-4-3:2000/A2:2011 (2011-09-02)

EMC emissions specification: EN 60947-4-3:2000 (2000-01-12)

+ EN 60947-4-3:2000/A1:2006 (2006-12-08)

+ EN 60947-4-3:2000/A2:2011 (2011-09-02)

Class A product

EMC immunity specification: EN 60947-4-3:2000 (2000-01-12)

EN 60947-4-3:2000/A1:2006 (2006-12-08)

EN 60947-4-3:2000/A2:2011 (2011-09-02)

Vibration tests: EN60947-1 annex Q category E

Shock tests: EN60947-1 annex Q category E

**Approvals**

- cUL: UL60947-4-1A and UL60947-1
- CE: EN60947-4-3 and EN 60947-1

A certificate of conformity can be provided on simple request

CCC exempt: Product not listed in catalogue of products subject to China Compulsory Certification

RoHS: Restriction of Hazardous Substances compliant

Protection:

- CE: IP20, According to EN60529
- UL: Open type

**Condition of use**

- Atmosphere: Non-corrosive, non-explosive, non-conductive
- Degree of pollution: Degree 2
- Storage temperature: –25°C to 70°C (maximum)
- Operating temperature: 0 to 45°C without derating
- Altitude: 1000m maximum at 45°C
  
  2000m maximum at 40°C
  
  For higher temperature see de-rating curves below
- Humidity limits: 5% to 95% RH (non-condensing)

**Power**

- Nominal current: 16 to 50A
- Nominal voltage: 100V to 500V (+10%/-15%). Refer to order code for more details
- Frequency: 47Hz to 63Hz
- Short circuit protection: High speed fuse (coordination Type 1)
- Type of loads: AC51: Pure resistive
  
  AC55b: Transformer Primary
  
  AC56a: Short wave infra-red
- Power terminals: Safe cage type, cable size 1.5 to 16mm²
  
 tightening torque 2.3Nm (20.4 lb.In)
- Safety earth screw terminal: Cable size 1.5 to 16mm²
  
  tightening torque 2.3Nm (20.4 lb.In)

**Control**

- Supply of electronics: Self powered product: 100V ac to 500V ac
- Auxiliary supply: 115V ac or 230V ac
  
  Auxiliary supply must be in phase with the line. The control circuit shall be protected by a ATM2 fuse rated 600V ac/dc, 2A, 100kA
- Control setpoint: Either analogue (analogue input or potentiometer) or logic
- Analogue input signal:
  
  DC voltage: 0-5V, 0-10V, Input impedance 100k ohms
  
  DC current: 4-20mA 250 ohms
  
  Burden resistor 250 ohms
- Potentiometer:
  
  A ‘5V user’ voltage is available between terminals 5 and 7 to be used with an external potentiometer of 10Kohm. One potentiometer per unit should be used
- Logic:
  
  Contact for On/Off logic operation
- Control terminals: Plug-in connector 0.5 to 2.5mm² (24 to 12AWG) cables
  
  Tightening torque 0.6 Nm (5.31 lb.In)

**Control Performance**

- Linearity: Better than ±2% of the full range
- Stability: Better than ±2% of the full range with constant resistance
- Automatic compensation for supply fluctuation (variation: between –10% and +10% of the nominal voltage)
- Firing modes:
  
  Burst: Burst variable (16 periods)
  
  Single cycle
  
  Advanced single cycle
- Phase angle: With or without current limit
